### Project Information

**Category:** Water/Wastewater

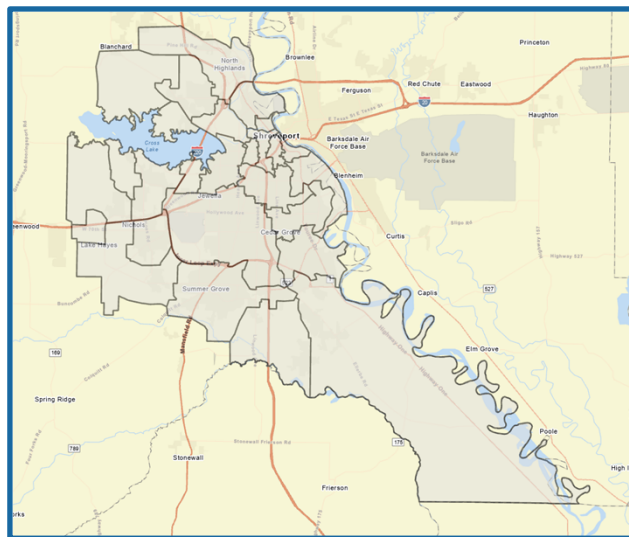

**Asset Type:** Collection & Distribution System

**Designer:** CWS PMC

**Contractor:** Wicker Construction

**Completion Date:** Ongoing

**Project Cost:** \$5,000,000/year

### Project Description

On-Demand emergency and planned water and sewer repairs identified by Department of water and Sewer and PMC. Typically, deep sewer repair and large diameter water and/or sewer main repairs that are more difficult and require excavation equipment larger than City owns. Gravity sewer mains, sewer force mains, water mains, valves, and manholes are the majority of critical repairs needed due to failing infrastructure. The City has 3 different contracts to perform this work necessary to maintain City's infrastructure. These contractors are Wicker Construction, Hall Builders (FSC) and Bear Construction (FSC).
