## Edwards Street Sewer Improvements

Planning

Design

Construction

Completed

### Project Information

**Category:** Wastewater

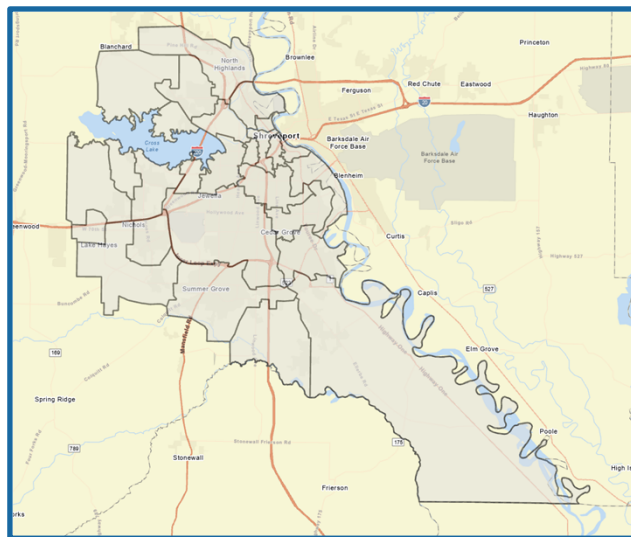

**Asset Type:** Collection System

**Designer:** CWS PMC

**Contractor:** Wicker Construction

**Completion Date:** January 2021

**Project Cost:** \$30,000

### Project Description

Installed a CIPP liner within an alley between Edwards Street and Milam Street due to sewer entering a AEP/Swepeco electrical manhole in Edwards Street. After investigation using CES it was determined that there was a collapsed main in Edwards Street just north of the electrical manhole and repair was made using City's On-Demand Contractor. This project was not necessary to prevent any SSOs or due to critical condition of existing sewer mains in alley.
